

Use a calculator to estimate the value of each irrational number. Then, order the numbers by graphing each on the number line. The value of  $e$  is approximately 2.718281828459.

$$\sqrt{2} = 1.41 \quad \pi = 3.14$$

$$\frac{7\sqrt{3}}{5} = 2.42$$

$$\sqrt{6} = 2.45$$

$$e = 2.72$$
