

Use a calculator to estimate the value of each irrational number. Then, compare them by graphing their positions on a number line. The value of  $e$  is approximately 2.718281828459.

$\sqrt{2}$	$\pi$	$\frac{7\sqrt{3}}{5}$	$\sqrt{6}$	$e$
1.41	3.14	2.42	2.45	2.72
